

ZAX 800

The **ZAX 800** control panel provides a superb interface to monitor data from doors, windows, smoke and motion detectors. Any violation of these sensors while the system is armed will result in an alarm condition activating the siren and strobe. The **ZAX 800** also features an on board communicator that is available to then report these conditions instantly to your Security company via radio and or telephone.

Specifications

Features of the ZAX 800

- Modern Appearance keypad to complement a wide range of decor. The backlit keys allow 24 hour operation.
- Intelligent Design allows for simple, no fuss user functionality. All major functions can be performed via single touch "hot" keys.
- **Quick Arm** - allows single button for arm and stay mode.
- Programmable Chime Zones - any zones that have been preprogrammed as 'chime zones' will cause the keypad to 'beep' when violated.

Even More Features

- Separate Entry and Exit Delays
- **User Codes** - sixteen separate programmable 4 digit user codes including a duress code and a cancel code.
- **Auto-arm** - the panel can be programmed to arm at a pre-determined time every day.
- **Excellent Lightning Protection** - provided by specialised ZAX tracking and transient suppressors.
- **Remote Arming** - convenient optional feature with audible verification of arm condition.
- **Stay Mode** - in this mode rooms that have been designated as 'at home' zones will be automatically bypassed, enabling the system to be armed while the premises is still occupied. Sleep securely!
- **Trouble Status Indicator** - notifies user of trouble conditions via flashing LED and/or keypad buzzer.
